# A WORD TO OUR CUSTOMERS

Dear Customer or Reader:—

Another year has rolled around and we are again at the beginning of the 1937 season for purchasing of glad bulbs for our gardens next spring. I am submitting my new catalogue of select varieties with greater confidence than ever, having dropped some 20 varieties and added about as many more of the newer introductions.

We heartily wish you success with your 1937 garden; not only because your success helps to pave the way for ours, but because a garden of flowers brings gladness and health to you, and brightens the lives of your friends and neighbors.

To avoid disappointment you should get your order in reasonably early, especially if you are going to order some of the newer varieties, as many of these are limited in quantity.

Our prices are as low as consistent, quality considered. Of course you may grow a poor crop from good seed, but you can't grow a good crop from poor seed.

The different sizes will be designated as follows: L. for large, M. for medium; S. for small and Blts. for bulblets. Large and medium bulbs are always of blooming size and many of the small ones will bloom and will make the best of bulbs for the next season.

I would mention that there are a few varieties that do not make very large bulbs. M. size, in order words, would be a good size for a few of these varieties.

All orders of \$1.00 or over will be prepaid anywhere in U. S. A. I am giving no discounts on these prices but I do try to give all customers a pleasant surprise. Of course, we can give wholesale quotations on large lots. Please send list of just what you want for estimates.

Cultural directions and best thrip control methods will be included in each shipment.

Quotations in the general list usually made three at the dozen rate, as we cannot afford to put up single items for less than 10c. So you get the benefit of the dozen rate whether you order three, six, nine or twelve.

## SPECIAL NOTICE

Our "Perfectly Practical Practically Perfect Plan Stakes" will be sold to all customers at the wholesale rate: \$5.00 per 100, not less than 25 at these rates.

These stakes are just what the name implies, and will save you many times their cost in a few years time. I have found makeshift stakes are very expensive, and unsatisfactory in the long run.
